

2020 Steven D. Stinson Leadership in Natural Resources Scholarship Awards

The Steven D. Stinson Leadership in Natural Resources Scholarship Committee is delighted to honor three outstanding candidates with scholarships for the 2020-2021 school year. We have offered the following awards: \$1,625 to Alannah Cross to support her pursuit of a Bachelor of Science in Forest Resource Management at Grays Harbor College; \$1,550 to Erik Kemp to support his Master's degree in Environmental Science at Brigham Young University where he will focus on plant pathology; and \$1,325 to Justin Stanley to continue his studies in rangeland management at the University of Idaho. Each of these deserving students comes with great recommendations from their professors and employers and we believe they will become the leaders of tomorrow. Thank you for your generous support to the Steve Stinson Scholarship fund that continues to make this perpetual offering of scholarships to deserving students in natural resource fields a reality. For more information on how to make donations to the fund please see <https://www.wafarmforestry.com/node/159>.

"My interest in forestry began after working for Washington Conservation Corps...I (have since) served as the chair for SAF Grays Harbor Student Chapter. Last summer I intern(ed) for Port Blakely Tree Farms; this summer, I look forward to working for the City of Montesano as a forestry intern. In the future, I would like to make a positive impact as a forester by improving the conditions of our forests and watersheds, as well as enhancing outdoor opportunities throughout Washington." Alannah Cross

"It makes me happy to know that there are organizations like the WFFA that support individuals studying natural resources. Like Steven D. Stinson, I am working on a degree in Environmental Science...to pursue my passion for natural resources." Erik Kemp
